

## Vidaview Life Story Board Introductory Workshop

The Life Story Board is an innovative,  
visual-tactile narrative tool

- for counsellors, therapists, social workers and mental health professionals in client-centred care;
- social science researchers and graduate students interested in a novel visual qualitative interview tool
- interests in its use in narrative writing, creative arts, community and cultural contexts

### Objectives:

- to introduce the Life Story Board and its use in assessment, counselling, and research.
- to orient participants to the LSB process and toolkit

The workshop will be an engaging mix of presentation, orientation, demonstration of the Life Story Board. The afternoon is hands on experiential practice to explore how it may apply in your use scenario
